Date: 01/19/17 Rev: IR

Instructions for Continued Airworthiness

Cessna 180, 182, 185, and 188

Aft Fuselage Inspection Panels

STC SA00858DE

Aircraft Serial Number 31347

Aircraft Registration N9248C

Section 04 - Weight and Balance

Weight and Balance Information

The physical modification associated with this STC is limited to the installation of the doubler and panels. The effect to weight and balance is considered at the initial installation and no further amendments to the weight and balance are required. The change to the weight and balance will be .5 lb added at station 202 for the 180/182/188 models, and .5 lb added at station 205 for the 188 model.

It is the responsibility of the installer to ensure weight and balance records for the aircraft are adequately updated.

Section 05 - Placards and Markings

Placards

No Placards are required for this modification.

Markings

No markings, in addition to standard part marking per 14 CFR Part 45 § 45.15, are required for this modification.

Section 06 – Servicing

Maintenance Support Equipment

There are no special tools or equipment required for maintenance of the *Aft Fuselage Inspection Panels* modification.

Consumable Material

There are no consumable materials, other than standard shop cleaning chemicals, required for the maintenance of this modification.

Routine Cleaning

This modification requires no special care different than the rest of the aluminum structure of the airframe.

Application of Protective Treatment

Exposed metal should be touched up with aircraft grade primer and paint. Apply evenly with other adjoining painted surfaces.

Recommended Overhaul Period

There is no recommended overhaul period associated with this type design change required for the continued airworthiness of the *Aft Fuselage Inspection Panels* modification.

Revision to ICA

When a revision to the ICA is necessary, an updated ICA will be submitted to the Aircraft Certification Office (ACO) for review and acceptance. The date of the acceptance will be annotated on the Revision Page of the ICA.

It is the responsibility of the operator to ensure they have the latest revision of this ICA. For inquiries regarding the content and currency of this ICA, contact:

Aeropod Inc.
18961 East Kent Circle
Aurora, Colorado 80013
aeropodinc@gmail.com
720-220-8969 303-888-2728

Change Bars

The use of change bars in the right margin identifies text, figures or pages that have been added or extensively modified in accordance with this revision, except for initial release.

Section 02 – System Description

The installation consists of the installation of two inspection panels and two doublers installed in the aft fuselage. These panels are provided for inspection of the tail wheel/rudder control system parts. Access is provided by removing screws used to fasten the panels to the doublers. One inspection panel is located on each side of the fuselage.

Parts List

See the Parts List on Aeropod Inc. Drawing AP0712057-KIT, *Tail Inspection Panel Installation*. Contact Aeropod Inc. to verify current revision of the drawing.

AIRWORTHINESS LIMITATIONS SECTION

The Airworthiness Limitations section is FAA approved and specifies maintenance required under Secs. 43.16 and 91.403 of the Federal Aviation Regulations unless an alternative program has been FAA approved.

No airworthiness limitations are associated with the Aft Fuselage Inspection panel type design change per STC SA00858DE
