1.0 Introduction

1.1 Training Program Introduction

145.163, 145.209, AC 145-10

A current copy of these Manuals shall be accessible to maintenance personnel during the performance of maintenance activity. A current copy of these Manuals and all its revision will be provided to the Certificate Holding District Office (CHDO).

Forms are contained in Chapter 9 of the RS-QCM.

2.0 Revision Control

2.1 Training Manual Revisions

145.163, 145.209(e)

The Accountable Manager is responsible for the Training Manual content and revision control but may delegate tasks to a qualified representative without relinquishing overall responsibility.

Revisions, prepared by the Accountable Manager or a qualified representative, are numbered, dated, and submitted to the FAA CHDO for approval. The assigned FAA inspector is notified of upcoming revisions, and a cover letter tracks submissions, including the manual title, date, and revision number. Revisions are sent electronically in PDF format within seven days, and distribution occurs only after FAA approval.

Due to the limited number of manuals, the Accountable Manager or representative updates each manual, records revisions, and inserts an updated list of effective pages. Revised pages include the revision number, date, and a black margin line marking changes unless the entire manual is reissued. Superseded manuals are destroyed or clearly marked.

Employees may receive training on revisions, especially when procedural changes occur.

3.0 Training Needs Assessment Process

145.151, 145.153, 145.155, 145.157

The Training Needs Assessment Process will be used to assess and evaluate new employee candidates and for current employees, when they change positions or need specialized training. Skysource Aviation Repair Station will specifically revise the training program and identify additional training needs when:

- Additional training needs are identified, through the needs assessment(s) outlined in this manual.
- Changes to the Repair Station's Operation Specifications (Ops Specs), Class Ratings, Capabilities List, facilities, equipment, or scope of work that may require additional training.
- New regulatory requirements are introduced.
- FAA or other external agency oversight findings.
- Investigations that lead to voluntary disclosures.
- Findings from the Skysource Aviation Repair Station Internal Self Evaluations.
- The results from audits related to maintenance human factors.
- New tools, equipment, or skills are required to perform the work properly.
- Changes to job position duties, tasks, and technical job functions.
- Customer requirements.
- Employment procedures for hiring.
- Feedback from employees.

The Repair Station, Training Needs Assessment will be conducted based on work assignments for all of the employees to determine the overall training requirements of the employees. These assessments will evaluate

the facilities and the personnel for the items specified later within this chapter. In general these assessments topics can be summarized as:

- Methods.
- Techniques.
- Practices.
- Aids.
- Equipment.
- Tools.

3.1 Repair Station Assessment

Changes to the Facilities, Equipment, or Work Scope

Skysource Aviation will conduct a review of its current approved training program if Skysource Aviation is planning a change to its facilities, equipment, or work scope as reflected in the current Class Ratings, Ops Specs, Capabilities List. This review will be performed prior to any changes and used to identify any additional training needed to account for the changes being proposed. This review will be done by the Business Manager or their designee. The need for additional training will be based on an analysis of the new work to be performed, the capability of employees, and the availability of in-house training. The results of this review will be documented by a written synopsis of the findings and archived be at the Billings, MT base of operations.

3.2 Personnel Assessments

Assessment Process & Intervals

Interview Process:

- General Aircraft Knowledge (Oral)
- Practical Aircraft Knowledge (Oral)

Initial Training (New Hires):

- Repair Station Indoctrination: Manuals, processes, and procedures
- Title 14 CFR Regulations Training
- Job-Specific Task Demonstration

Personnel Responsibilities & Qualifications

Accountable Manager (or Qualified Representative)

- Oversees all maintenance and alterations
- Must possess the necessary knowledge and skills
- Refer to Chapter 3, Section 3.2 of the RS-QCM

Inspector

- Reports to the Accountable Manager
- Ensures compliance with regulations and inspection procedures
- Refer to Chapter 3, Section 3.4 of the RS-QCM

Inspector Skills:

- Understanding of work order system and receiving inspection
- Use of precision measuring and testing equipment
- Knowledge of return-to-service and FAA Form 337 requirements
- Familiarity with different types of inspections

Supervisor

- Reports to the Accountable Manager
- Oversees personnel and ensures proper maintenance and alterations
- Refer to Chapter 3, Section 3.3 of the RS-QCM

Supervisor Skills:

- Workflow management and scheduling

- Effective communication with management, staff, and customers
- Knowledge of personnel skills under supervision
- Familiarity with SUPs and related processes

Mechanic / Technician
- Reports to the Supervisor
- Responsible for approved tasks and required skills
- Refer to Chapter 3, Section 3.5 of the RS-QCM

Mechanic / Technician Skills:
- Use of precision measuring equipment
- Operation of tools and test equipment for troubleshooting, repairs, and installations
- Fabrication and modification of structural, composite, and upholstery components
- Manufacturer training as required

Repairman
- Reports to the Accountable Manager
- Performs approved repairs and maintenance
- Refer to Chapter 3, Section 3.5 of the RS-QCM

Avionic Repairman Skills:
- Use of precision measuring and bench test equipment
- Troubleshooting, repairing, and testing instruments
- Execution of maintenance and operational checks

Trainee (Non-Certificated Maintenance Personnel)
- Reports to the Supervisor
- Evaluated based on experience, resume, and interview
- Assigned supervision before performing tasks
- Must familiarize with "All Personnel" skills (listed below)

Parts Department / Purchasing
- Reports to the Accountable Manager
- Manages part requests, purchasing, and receiving inspections

Skills:
- Knowledge of parts request and purchasing process
- Understanding of receiving inspections and SUPs procedures
- Familiarity with work order system

Hiring & Assessment of New Employees

Evaluation Before Hiring:
- General aircraft knowledge interview/assessment
- Oral questioning or skills assessment
- Tailored to job requirements
- Failure results in disqualification

New Hire Assessment:
- Supervisor evaluates qualifications and submits to the Accountable Manager
- Training needs assessment determines required training
- Supervisor ensures training is completed

All Personnel – General Skills
- Repair Station Indoctrination & Recurrent Training
- Compliance with Repair Station Manual and forms

- Understanding of Title 14 CFR requirements
- Use of technical publications and proper documentation
- Identifying inspection steps and ensuring completion
- Effective communication with management and coworkers
- Manufacturer training as required

All personnel will be trained on applicable procedures and equipment before use. The repair station maintains records of training certifications per Chapter 4, Section 4.6 of this manual.

4.0 Training

145.163, 145.165, 145.209, AC 145-10 Chg. 1

4.1 Types of Training

Indoc / Initial Training

Indoc / Initial Training will vary based on task assignments. The Indoc / Initial Training for new hires will include the following:

- New employees will be interviewed to determine training needs.
- New employees will receive indoctrination on general procedures specific to the repair station's operations, maintenance and inspection systems, and regulatory compliance (Title 14 CFR).
- Employees will be trained on all functions relevant to their assigned tasks.

Employees must read and understand the RS-QCM, Training Manual, and the disposition of work orders and required forms for maintenance and alterations. On-the-job training (OJT) will be the primary method of training. Employees may also attend seminars when the content is applicable to their tasks or for development. Various media will be used to maintain training currency.

Previous experience may be considered to credit employees with certain aspects of Initial Training, based on reviews of resumes, individual training records, and relevant interviews.

Recurrent Training

Recurrent Training will be provided as needed, covering the same topics as initial training or addressing emerging needs. This training refreshes employees' knowledge of repair station policies, programs, and regulatory requirements. It also includes updates on changes to repair station ratings, new tools, equipment, materials, and methods. Recurrent Training will typically be completed annually, but may be conducted more frequently based on an employee's needs, as determined by the Supervisor and Accountable Manager or qualified representative. Employees may also need Recurrent Training when there are changes to standard operating or inspection procedures.

Course Definition for Initial & Recurrent Training

This section of the manual contains definition of material covered in training of the Repair Station employees.

- Repair station employees will receive training any time a process or procedure is changed.
- Each person performing maintenance or alterations of aviation products will be trained on the following:
  - Repair Station/Quality Control Manuals.
  - The Applicable Federal Aviation Regulations (Title 14 CFR) for the performance of the assigned task.
  - Work Order Flow.
  - Specific Job Function.
  - Manufacturer / Supervisor instructions for the task to be performed.
  - Applicable Airworthiness Directives and Service Bulletins.

- Appropriate methods for test and appropriate approval for return to service documents.
- Compliance with Hazardous materials rules.
- Identification and Reporting of Suspected Unapproved Parts (FAA Form 8120-11)
- Any other subject deemed necessary by the Accountable Manager, or qualified representative.

Remedial Training

Remedial training will be administered for employees that are having performance issues. The procedures for remedial training will be the same as initial, except the techniques will vary to provide a greater understanding of material by the Accountable Manager, or qualified representative,. This training will be designed to fix an immediate knowledge or skill deficiency and may focus on just one individual. Depending on specific circumstances, the training may be by any of the Training Methods outlined in Section 4.2 of this Chapter of the Skysource Aviation Training Manual.

- Repair station employees will be required to demonstrate knowledge and skills to an approval to return to service standard prior to returning to work on customer work orders.
- Employee's training records will reflect areas where remedial training was used to meet acceptable standards. This info will be used in the training needs assessment for the employee's future training.

OJT – On the Job Training

OJT – On the Job Training will be administered as required for Initial, Recurrent, and Remedial Training. OJT Training will be administered by a Repair Station Personnel that have familiarity and proficiency with the subject being trained and has been approved by the Accountable Manager, or qualified representative, per this chapter of the Skysource Aviation Training Manual section 4.3. OJT Training will be documented on the Training Attendance Record (Form # SARS-5002) IAW the instructions in the RS-QCM Chapter 9.

4.2 Training Methods and Sources

Using the information developed during the course definition phase, Skysource Aviation will evaluate training method(s), source(s), and instructor(s) to determine whether the appropriate and necessary knowledge or skill will be transferred to employees.

Training Methods

Skysource Aviation uses all training sources and methods available to provide employees with the information necessary for them to perform assigned maintenance (including inspection), preventative maintenance, and alterations tasks correctly.

Training Sources

The majority of the training provided by this repair station will use on-the-job training (OJT) methodology. Sources available for training will be continually monitored to ensure Skysource Aviation is aware of its alternatives. When a new or revised training need is identified, the available options will be reviewed. This process may include consultation with the FAA PAI / PMI, Skysource Aviation, other repair stations, manufacturers, and local colleges for available training.

4.3 Training Instructors

Qualified instructors, manufacturer / vendor representatives, and / or qualified Repair Station Personnel will conduct training. Manufacturer / vendor representatives are considered qualified to provide instruction on their respective areas of expertise.

Repair Station Personnel acting as Instructors are considered to be individuals qualified to instruct on the subject matter that they are teaching. To ensure quality training the teaching ability is assured in all instructors. An Instructor's qualification may be granted by the Accountable Manager, or qualified representative, based on an evaluation of an employee's past experience to ensure familiarity with the subject being taught. Additionally, when instructing a class, a Repair Station Instructor receives Recurrent Training Credit for the subject taught.

4.6 Training Records

145.163

The Accountable Manager, or qualified representative, is responsible for establishing standards for the creation and retention of training records for all Skysource Aviation employees that perform maintenance (including inspection), preventive maintenance, and alteration tasks.

Skysource Aviation maintains an Employee Personnel File, which includes their training records, to reflect a record of training provided. This Employee's Personnel File is initiated upon notification of hire. The Repair Station will utilize the "Training Attendance Record" to document training provided to the employee. This Training Attendance Record Form will include, but not limited to, the following information (reference the RS-QCM chapter 9):

- Training Type / Name.
- Instructor / Date
- Printed Name of Attendee
- Signature of Attendee

This Training Attendance Record Form shall be maintained and archived within the Employee's Personnel File. Skysource Aviation maintains individual training records for each employee's entire course of employment and for two years thereafter.

5.0 Part 121, 125, 129 & 135 Operators

145.165, 145.205, 145.206

Skysource Aviation may perform work for air carriers or commercial operators under Title 14 CFR § 121, 125, 129, or 135.

Before Skysource Aviation performs maintenance (including inspection), preventive maintenance, or alteration under its Title 14 CFR § 145 certificate, for an air carrier or commercial operator, the Accountable Manager, or qualified representative, will conduct training needs assessment, per chapter 3 of this training manual and applicable personnel will be trained in accordance with the air carrier or commercial operator's requirements as applicable. The training needs assessment will be documented and kept on file.

6.0 Personnel Capabilities

145.151, 145.153, 145.155, 145.157

All Personnel will only perform tasks for the Repair Station in which they have been trained on as well as shown and demonstrated proficiencies in IAW the guidelines set forth within this Training Manual. Tasks that employees are approved to perform are reflected within their individual Employee Files and their Training Records. Authority to Inspect, Sign Logbook Entries and Return to Service aircraft and / or article are reflected on the Personnel Roster in its latest revision.

6.1 Trainee (Non – Certificated) Personnel

Trainee (Non-Certificated) Personnel will be evaluated IAW the Training Needs Assessment Process and trained, as necessary. All aircraft maintenance performed by Trainee (Non – Certificated) Personnel will be supervised / surveyed IAW the guidelines set forth in this Training Manual.

6.2 Certificated Personnel

Certificated Personnel will be evaluated IAW the Training Needs Assessment Program and be trained as necessary and will only perform tasks for the Repair Station in which they have been trained on as well as shown and demonstrated proficiencies in IAW the guidelines set forth within this Training Manual. The functions performed by Certificated Personnel will be within the guidelines for the position for which they hold and / or for the tasks for which they have been trained on as well as shown and demonstrated proficiencies in IAW the guidelines set forth within this Training Manual.

6.3 Interim (Contract) Personnel

During periods of heavy workload, Skysource Aviation may supplement its workforce with interim (contract) maintenance employees. Before these individuals begin work for Skysource Aviation they must undergo a needs assessment using the Training Needs Assessment Form and the instructions contained within this Training Manual.

The Accountable Manager, or qualified representative, will coordinate with the supervisor of the area where the individuals will work to conduct the needs assessment and ensure all individuals are provided training appropriate to the particular assignment before they are required to begin work.

The Accountable Manager, or qualified representative, must make and retain training records for all individuals performing maintenance (including inspection), preventive maintenance, and alteration tasks IAW Title 14 CFR § 145.163.

Interim (Contract) Personnel will only perform tasks for the Repair Station in which they have been trained on as well as shown and demonstrated proficiencies in IAW the guidelines set forth within this Training Manual and within the guidelines for the position for which they hold.

7.0 Forms

All forms referred to in this manual will be kept and maintained in the Skysource Aviation office.
